## The rigging and technical details

The height of the main mast, the overall length or the sail surface – technical details that give us an idea of the power of the ship and the capability of the crew. The rigging of a barque is part of that.

Rig: Three mast barque  
Building year: 1926  
Home port: The Netherlands  
Measures: Length: 59 m  
Width: 7,01 m  
Depth: 3,49 m  
Tonnage: 212 tons  
Main mast: 31 m  
Sail surface: 1050 m<sup>2</sup>  
Speed: up to 9 knots / motoring up to 7 knots  
Machine: Main motor: Caterpillar 550 hp + bow thruster  
2 generators (2x 40 kVA)

### Three Mast Barque Artemis

Day charter: 120 guests, 32-36 persons in cabins

The Artemis – named after the goddess of the hunt – was built in Norway in 1926 for whaling purposes and sailed until the late 1940s in the North and South Polar Seas. In the fifties it was converted into a freighter and sailed between Asia and South America until she was no longer competitive and was taken out of service. In 2001 the Artemis got new owners who transformed her into the elegant sailing ship she once was. In the hold, where many a whale had been skinned, you now find sixteen comfortable cabins with shower and toilet. The ship has central heating and air-conditioning; the most modern navigation and communication equipment and a small hotel kitchen that has everything you can think of. Of course all prescribed safety provisions for sailing the seven seas are present.

The Artemis satisfies even the most demanding guest with her excellent sailing qualities and her unique combination of sailing tradition and modern comfort.
